Undertaker: Harbin Science and Technology Bureau

Dear _____:

China Harbin International Exhibition of Scientific and Technological Achievements, a brand famous meeting with various themes: International high-end technology transfer, international high-tech product trade, international talent matchmaking services as well as international science and technology innovation cooperation and exchange. China Harbin International Exhibition of Scientific and Technological Achievements integrates achievement matchmaking, product trade, high-end forum, project investment attraction and talent exchange. It is an interactive carrier of matchmaking, exchange and cooperation for domestic and foreign universities, scientific research institutes, high and new technology enterprises and various service agencies. It is a prominent platform for high-tech achievement commercialization, industrialization and internationalization as well as economic and technology exchange and cooperation among different countries and regions.

The major theme of The Seventh Harbin International Exhibition of Scientific and Technological Achievements is "regional innovation promotion through open cooperation and mutual benefit through resources sharing". Domestic and foreign colleges and universities, research institutes as well as scientific and technological enterprises in key high and new technology fields are invited to participate in the exhibition. There will be more than ten countries, more than one hundred groups, more than ten thousand projects and visitors of more than one hundred thousand person-times attending the exhibition. The exhibition includes high-tech achievement and product display and exhibition, the 3rd 45° N. Lat. • Innovation Forum, international science and technology cooperation work and exchange meeting, project matchmaking and road show activity, etc, and it is a crucial platform for scientific and technological achievements transfer & transformation and technology product matchmaking & cooperation in north latitude countries and regions.

Thank you for participating in our activities. Your reply will be highly appreciated!

Organizing Committee of China Harbin International
Exhibition of Scientific and Technological Achievements
March 1, 2018

Exhibition Contents

International scientific and technological achievement and product exhibition and trade

The exhibition area is 20,000 square meters. The exhibition focuses on displaying technology innovation achievements and products at home and abroad as well as technology innovation achievements and products of different countries. It offers an effective platform of communication, exchange, matchmaking and trade for domestic and foreign colleges and universities, scientific research institutes as well as science and technology enterprises.

The Third 45° N. Lat. • Innovation Forum

With the theme of regional innovation and cooperation of world' s science and technology, relevant national government dignitaries as well as well-known scientists, entrepreneurs, economists, etc. are invited for giving speeches on topics of innovative science and technology development in different countries, regional science and technology cooperation worldwide, industry cooperation, international scientific and technological exchanges and cooperation, etc., thereby building a think-tank for idea integration and wisdom collision.

International science and technology cooperation special topic meeting

High and new technology and product special introduction and marketing event will be held in the key high-tech field during the exhibition period, and various international cooperation exchange and working meetings will be held with science and technology, culture, talent and other cooperation exchange as themes.

Method for exhibition participation
